Employability skills for young women in technology by SAP LABS

@ ANANYA we have begun a very interesting journey to scale up and reach to more deserving young women in technology we have partnered along with Dr Ambedkar Institute of Technology.

We set forth on this journey along with SAPLABS, who have partnered with our endeavor by sending volunteers, this time around from SAP LABS SPEAK TO LEAD TOASTMASTERS CLUB during their annual "MONTH OF SERVICE" to train young women in technology with industry relevant Employability skills from across all the engineering disciplines. under Ananya.

This time around our training led by the very talented and passionate SAPLABS volunteers Aman, Bhargavi, Harshith and Akshay, which had four components of Public Speaking, interview skills, Group Discussion and a primer to effective Body Language. As they are also a part of the SAPLABS SPEAK TO LEAD Toastmasters club which has given them a supportive learning environment to become confident public speakers and strong leaders they now want to share their learning and change lives.
