

EMPOWER ANANYA

The empowered.....

Meet Ananya.....

Rakshitha

She is the first electronics engineer in her family, the only girl from her village Gollahalli in Gauribidnur Taluk of Karnataka.

She hails from a impoverished family with an annual income less than a lakh of rupees.

She gained SKILLS AND CONFIDENCE at Ananya and easily cleared 3 rounds of interviews and secured a job at IBM with a starting annual package of about 3.45 lakhs INR..

She is now a “star” in her village of 200 houses and IS AN INSPIRATION TO others in the village especially for parents who are enthused enough to rethink on their daughters’ education
